1. The FDA says it may take until 2096 to release tax-funded Pfizer Covid Vaccine clinical trial documents for a vaccine millions of Americans are being mandated to take. 1,223 people died (5.6%) out of 21,724 participants who received BNT162b2 (instead of placebo) within the first 90 days of the trial.

2. The Covid-19 test is not a discrete or definitive test—it concurrently detects for other viruses such as influenzas.

True. There is no approved test to diagnose for Covid-19. The CDC discontinued the 2019-nCoV Real-time RT-PCR Diagnostic Panel test upon which case statistics were based and reported. <https://www.who.int/publications/i/item/WHO-2019-nCoV-lab-testing-2021> PCR tests were inaccurate (90% false positives) with cycling of PCR tests often in excess of 35+ amplifications counted as “cases.” https://brandnewtube.com/watch/kary-mullis-what-he-said-about-the-pcr-test-covid1984_83H2TKPRvA1udPu.html Currently, there is only one Covid test authorized for emergency use—the CDC says it wants labs to test people for multiple viruses simultaneously, using what is known as “a multiplexed method.” <https://www.cdc.gov/coronavirus/2019-ncov/lab/testing.html> (Testing is historically inconclusive for influenza.) <https://pubmed.ncbi.nlm.nih.gov/12586981/>

3. No children under the age of 12 participated in Pfizer’s ongoing Covid vaccine clinical trial, which included only 3,013 total pediatric participants, before the FDA authorized worldwide distribution to children as young as 5.

True. <https://www.pfizer.com/science/clinical-trials/children>

4. No vaccine for Covid—19 has been fully approved by the FDA.

True. <https://www.fda.gov/media/151710/download> Pfizer’s “Cominarty” was approved for marketing purposes only as the trial is ongoing; the final report is scheduled for October 31, 2024, after which it could be reviewed for full approval—it is not yet available on the market and is a “legally distinct” product than the Emergency Use Authorized BioNTech being administered. (This is a permanent, irreversible procedure and there is no recourse if anything ever goes wrong).

5. Countries and regions with 100% vaccination rate subsequently had the highest number of cases and went back under lockdown restrictions because vaccines drive the variants that increase transmissibility.

True. <https://www.rt.com/news/540442-gibraltar-cancels-christmas-covid/> <https://www.science.org/content/article/grim-warning-israel-vaccination-blunts-does-not-defeat-delta> Dr. Byram Bridle (Professor of Viral Immunology at University of Guelph) explains that similar to antibiotic resistance, Covid-19 variants are caused by not fully killing the virus, allowing for mutation, therefore, only individuals who are vaccinated can be creating variants. The CDC and WHO confirmed mutations lead to a weaker and more transmissible variant which means Delta and Omicron do not have the same potential for causing deaths as the original Covid-19 (wild-type or lab-made) strain. Dr. Bridle warns continual administration of vaccinations and boosters will exacerbate development of variants. No current evidence suggests unvaccinated individuals cause a rise in cases.

6. Several million Covid vaccine injuries and deaths have already been reported to VigiAccess, the adverse event database for the World Health Organization, and the Vaccine Adverse Event Reporting System (VAERS) in the United States. There is a significant worldwide uptick in excess deaths after vaccination. At least tens of thousands of Americans have already died within days after getting vaccinated for Covid-19; even more are permanently disabled.

7. Graphene hydroxide in Covid vaccine is causing internal bleeding fatalities in athletes; it’s non-biodegradable over time, and traditional autopsy exams don’t know how to detect for it.

8. A German study found that ZERO healthy children have died from Covid-19 but children have started dying from the vaccine.

9. The synthetic RNA and spike proteins that Covid vaccine instructs the body to make stay localized near the injection site and are degraded after a short period of time.

False. 8 months after inoculation, autopsies revealed synthetic RNA and spike proteins in the brain, where synthetic RNA could potentially regulate multiple gene expression. <https://www.citizensjournal.us/first-autopsy-of-dead-person-vaccinated-for-covid-found-to-contain-spike-proteins-in-every-bodily-organ/> <https://medicalxpress.com/news/2020-02-scientists-special-rna-brain-key.html>

10. Because Covid vaccine is legally classified as a synthetic gene product and not a traditional vaccine, no safety pharmacology studies on vital organs were required by the FDA or are being conducted by manufacturers. Autopsy results of people who died within 2 weeks following inoculation revealed lymphocytes aggressively attacked the liver, kidneys, spleen and uterus.

11. There is a coronavirus pandemic.

Unknown. The Covid-19 pandemic was illegally declared. Citizens are being awarded damages from the government based on: <https://www.davidmartin.world/wp-content/uploads/2020/05/SF95Addendum.pdf>

12. 86% of children suffered an adverse reaction to the Pfizer Covid-19 vaccine in the clinical trial.

14. Moderna's first product to market is the mRNA Covid vaccine authorized for emergency use. Their tagline is "hacking the software of life." Who is the hacker? A) Bill Gates B) China C) Aliens D) The elite ruling class E) Satan

Your guess is as good as mine. See the Terms & Conditions on the Covid vaccine consent form—Devil is in the details.

15. I am the owner of my body. It is personal property that belongs to me.

True. Mind, body and soul sovereignty are gifts bestowed by our Creator under natural law. A Man-made mandate or law cannot supersede this authority (unless you consent to giving access inside of your body which occurs with the first dose of nanotech).

16. I understand why a vaccine passport is so controversial and how it relates to Bill Gates' investments in ID2020.

17. Immunologists, geneticists, neuroscientists, pathologists, molecular biologists and primary physicians who have expressed safety concerns regarding the new mRNA vaccines are being censored and portrayed as anti-vax "conspiracy theorists."

18. Pregnant women who received Covid vaccinations during their first or second trimesters suffered an 82% spontaneous abortion rate, killing 4 out of 5 unborn babies.

19. During the era leading up to World War II, the Rockefellers championed eugenics laws passed in 27 states which allowed forcible sterilization toward their goal of 15,000,000 Americans. The Rockefellers are major sponsors of the global pandemic response.

21. Pfizer, J&J, and Moderna Covid vaccines were all completed in January 2020, based on Chinese sequencing data. China opted to use a traditional vaccine. In case the United States suffers catastrophic vaccine casualties within our military and police force, American citizens should retain our right to bear arms to deter war and foreign invasion.

True. <https://time.com/5882918/zhang-yongzhen-interview-china-coronavirus-genome/> The Sandy Hook Promise Foundation (and all American anti-gun propaganda) is funded by the Rothschild foreign banking family. China and the Elites are less likely to risk war against an informed, armed population where their pre-planned outcome is not guaranteed.

If you took the Covid vaccine, specific symptoms that may occur within weeks to months after inoculation that would be considered urgent and serious enough to visit an emergency room include: seizure or neurological symptoms such as difficulty speaking or moving, chest pressure or pain, shortness of breath, discomfort in one or both arms and the back, neck, jaw or stomach, a very severe headache, lightheadedness, or symptoms accompanied with nausea, or breaking out in a cold sweat. Ask your provider about filing a VAERS report in the Vaccine Adverse Event Reporting System so others may benefit from early warning signals associated with your outcome.
